

- P
- a) a filter bag adapted to be received in the catch
5 basin for capturing the solids which enter the catch basin
through [the] an inlet of the catch basin, said bag having an
open top adapted to be positioned at the catch basin inlet, a
closed bottom and bag sidewalls; [and]
- P
- b) a plurality of elongated lift flaps each having a
10 first end and a second end joining the top of the bag and adapted
to extend across [the] sidewalls of the catch basin [sidewalls]
at the catch basin inlet, loops defined in the flaps away from
the bag and spaced openings intermediate either end of each flap
in the loops, each of said loops adapted to receive a lift rod;
15 and
- P
- c) a plurality of lift rods of sufficient length
extended into the loops in the flaps so that portions of the rods
are exposed at the openings for attachment to lift members,
whereby portions of the flaps between the filter bag and the
20 loops are adapted to extend between the grate and the catch basin
inlet so that the grate sandwiches the flaps in place against the
catch basin and the flaps support the bag in the catch basin.

EP SUB DI 25. (Amended) The catch basin filter of claim [22] 23,
wherein the filter bag is formed of a woven material.

- P
30. (Amended) A method of installing a catch basin
filter in a catch basin, the catch basin comprising:
an inlet through which water and solids flow into the
catch basin, an outlet through which water flows out of the catch
basin, wherein the inlet is positioned above the outlet, and a

plurality of basin sidewalls, each sidewall having an upper end at the inlet and a recess located at the upper end, the sidewalls defining a chamber, the grate located on the top of the basin inlet and having grate sides positioned in the recesses, and the
10 filter comprising:

C3 a filter bag having an open top, a closed bottom and
one or more sidewalls extending between the top and the bottom
of the bag; and

15 a flap joining the top of each [of the sidewalls]
sidewall, said method comprising the steps of:

placing the filter bag in the catch basin so that each
of the bag sidewalls are adjacent to the catch basin sidewalls
and the filter bag open top is positioned above the filter bag
closed bottom;

20 placing [the] each of the filter bag flaps into the
recess of the upper end of the catch basin; and

sandwiching each of the filter bag flaps between the
top of the basin and the grate sides, thereby holding the bag in
place.

Please add claims 33-34.

--33.3 A catch basin filter for use with a catch basin
and a grate, wherein the catch basin filter includes:

CJ 5 a) a filter bag adapted to be received in the catch
basin filter for capturing the solids which enter the catch basin
through an inlet of the catch basin, said bag having a
rectangularly shaped open top adapted to be positioned at the
catch basin inlet, a closed bottom and four tapered bag
